Duration	7 mins 2 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**
Correct
Mark 1.00 out of 1.00
Flag question

During a binary search, what happens if the target element matches the middle element?

○ a. The list is sorted
● b. The search ends successfully ✓
○ c. The search continues in the right sublist
○ d. The search continues in the left sublist

Question **2**
Incorrect
Mark 0.00 out of 1.00
Flag question

What happens in a binary search if the list has an even number of elements?

○ a. The search stops
○ b. The middle element is chosen randomly
○ c. The higher middle element is chosen as the middle element
● d. The lower middle element is chosen as the middle element ✗

Question **3**
Correct
Mark 1.00 out of 1.00
Flag question

Which of the following is not the required condition for a binary search algorithm?

● a. There must be a mechanism to delete and/or insert elements in the list ✓
○ b. Number values should only be present
Number values should only be present

○ c. The list must be sorted
○ d. There should be direct access to the middle element in any sublist

Question **4**
Correct
Mark 1.00 out of 1.00
Flag question

What is the time complexity of linear search in the worst case?

○ a. O(1)
● b. O👎 ✓
○ c. O(log n)
○ d. O(n log n)

Question **5**
Correct
Mark 1.00 out of 1.00
Flag question

What is searching in the context of computer science?

● a. Determining whether an element is present in a list ✓
○ b. Deleting elements from a list
○ c. Inserting elements into a list
○ d. Sorting elements in a list

Question **6**
Correct
Mark 1.00 out of 1.00
Flag question

What is the first step in binary search?

○ a. Compare the target element with the first element in the list
○ b. Sort the list
● c. Compare the target element with the middle element in the list ✓
○ d. Divide the list into two equal parts

Question **7**
Correct
Mark 1.00 out of 1.00
Flag question

What is the advantage of binary search over linear search?

○ a. Binary search can find multiple instances of the target element
○ b. Binary search does not require dividing the list
○ c. Binary search works on unsorted lists
● d. Binary search has a lower time complexity on large, sorted lists ✓

Question **8**
Correct
Mark 1.00 out of 1.00
Flag question

Given an array arr = {45,77,89,90,94,99,100} and key = 99; what are the mid values(corresponding array elements) in the first and second levels of recursion?

● a. 90 and 99 ✓
○ b. 89 and 99
○ c. 90 and 94
○ d. 89 and 94

Question **9**
Correct
Mark 1.00 out of 1.00
Flag question

Which of the following is a conventional searching technique?

○ a. Binary search
● b. Linear search ✓
○ c. Hashing
○ d. Dynamic search

Question **10**
Correct
Mark 1.00 out of 1.00
Flag question

In binary search, what happens if the middle element does not match the target element?

○ a. The search continues from the beginning
○ b. The list is sorted
○ c. The search stops
● d. The search continues in the left or right sublist ✓

Question **11**
Correct
Mark 1.00 out of 1.00
Flag question

In binary search, if the target element is less than the middle element, where does the search continue?

○ a. In the right sublist
● b. In the left sublist ✓
○ c. In the entire list
○ d. At the beginning of the list

Question **12**
Correct
Mark 1.00 out of 1.00
Flag question

In which situation is linear search more efficient than binary search?

● a. When the list is small and unsorted ✓
○ b. When the list is small and sorted
○ c. When the list is large and unsorted
○ d. When the list is large and sorted

Question **13**
Correct
Mark 1.00 out of 1.00
Flag question

Which method of searching involves sequentially comparing each element until a match is found?

● a. Linear search ✓
○ b. Hashing
○ c. Jump search
○ d. Binary search

Question **14**
Correct
Mark 1.00 out of 1.00
Flag question

What is the key characteristic of binary search?

○ a. It always starts from the beginning of the list
● b. It can be applied only if the list is sorted ✓
○ c. It works on unsorted lists
○ d. It compares elements sequentially

Question **15**
Correct
Mark 1.00 out of 1.00
Flag question

In __________ checks the elements of a list, one at a time, without skipping any element.

● a. Linear search ✓
○ b. Hash search
○ c. Both (1) & (3)

○ d. Binary search
