Duration	3 mins 3 secs
Grade	**15.00** out of 15.00 (**100**%)

Question **1**
Complete
Mark 1.00 out of 1.00
Flag question

Two-way merge sort algorithm is used to sort the following elements in ascending order.
200,470,150,80,90,40,400,300,120,70
What is the order of these elements after second pass of the merge sort algorithm?

- ● a. 80,150,200,470,40,90,300,400,70,120
- ○ b. 200,470,80,150,40,90,300,400,70,120
- ○ c. 40,80,90,150,200,300,400,470,70,120
- ○ d. 40,70,80,90,120,150,200,300,400,470

The correct answer is:
80,150,200,470,40,90,300,400,70,120

Question **2**
Complete
Mark 1.00 out of 1.00
Flag question

In the context of sorting, what does the divide-and-conquer approach involve?

- ● a. Dividing the input into parts, solving each part, and combining the solutions
- ○ b. Sorting data in a single pass
- ○ c. Rearranging data without sorting
- ○ d. Sorting data sequentially

The correct answer is: Dividing the input into parts, solving each part, and combining the solutions

Question **3**
Complete
Mark 1.00 out of 1.00
Flag question

Which of the following is not an in-place sorting algorithm?

- ○ a. Quick sort
- ○ b. Heap sort
- ○ c. Selection sort
- ● d. Merge sort

The correct answer is:
Merge sort

Question **4**
Complete
Mark 1.00 out of 1.00
Flag question

What is one of the key advantages of using the built-in sorted() function in Python?

- ○ a. It requires external libraries
- ● b. It sorts data out of the box efficiently
- ○ c. It only works with integer arrays
- ○ d. It is less efficient than custom sorting algorithms

The correct answer is: It sorts data out of the box efficiently

Question **5**
Complete
Mark 1.00 out of 1.00
Flag question

Which algorithm is efficient for analyzing the frequency distribution of items in a list?

- ○ a. Bubble Sort
- ● b. Merge Sort
- ○ c. Linear Search
- ○ d. Quick Sort

The correct answer is: Merge Sort

Question **6**
Complete
Mark 1.00 out of 1.00
Flag question

Which of the following is a key reason for the importance of sorting algorithms?

- ○ a. Sorting decreases the efficiency of selection operations
- ○ b. Sorting makes it harder to search for items
- ● c. Sorting helps in finding duplicates quickly
- ○ d. Sorting is rarely used in programming

The correct answer is: Sorting helps in finding duplicates quickly

Question **7**
Complete
Mark 1.00 out of 1.00
Flag question

Which algorithm typically follows a divide-and-conquer structure?

- ○ a. Bubble Sort
- ● b. Merge Sort
- ○ c. Linear Search
- ○ d. Binary Search

The correct answer is: Merge Sort

Question **8**
Complete
Mark 1.00 out of 1.00
Flag question

Why is it advantageous to sort data before performing duplicate analysis?

- ○ a. It has no effect on the analysis process
- ● b. It allows for quicker identification of duplicates
- ○ c. It complicates the analysis process
- ○ d. It makes the analysis slower

The correct answer is: It allows for quicker identification of duplicates

Question **9**
Complete
Mark 1.00 out of 1.00
Flag question

Which Python function would you use to sort a list in-place?

- ○ a. arrange()
- ○ b. order()
- ○ c. sorted()
- ● d. sort()

The correct answer is: sort()

Question **10**
Complete
Mark 1.00 out of 1.00
Flag question

In Merge Sort, what happens after dividing the input into smaller parts?

- ● a. Each part is sorted independently
- ○ b. Each part is searched for a specific element
- ○ c. The parts are merged without sorting
- ○ d. The parts are ignored

The correct answer is: Each part is sorted independently

Question **11**
Complete
Mark 1.00 out of 1.00
Flag question

How does Merge Sort achieve its efficiency?

- ○ a. By comparing elements sequentially
- ○ b. By using the bubble-up method
- ○ c. By sorting data in a single pass
- ● d. By breaking the input into smaller parts and merging them

The correct answer is: By breaking the input into smaller parts and merging them

Question **12**
Complete
Mark 1.00 out of 1.00
Flag question

What is sorting in the context of computer science?

- ● a. Arranging data in a particular format
- ○ b. Deleting data from a list
- ○ c. Searching for data in a list
- ○ d. Inserting data into a list

The correct answer is: Arranging data in a particular format

Question **13**
Complete
Mark 1.00 out of 1.00
Flag question

________is putting an element in the appropriate place in a sorted list yields a larger sorted order list.

- ● a. Insertion
- ○ b. Extraction
- ○ c. Distribution
- ○ d. Selection

The correct answer is:
Insertion

Question **14**
Complete
Mark 1.00 out of 1.00
Flag question

What type of problems can sorting help solve efficiently?

- ● a. All of the above
- ○ b. Selection
- ○ c. Searching
- ○ d. Duplicates

The correct answer is: All of the above

Question **15**
Complete
Mark 1.00 out of 1.00
Flag question

What is a characteristic of the merge sort algorithm?

- ○ a. It sorts data using a single pass
- ○ b. It does not require recursion
- ○ c. It is less efficient than bubble sort
- ● d. It is based on the divide-and-conquer approach

The correct answer is: It is based on the divide-and-conquer approach
